

NatSol the remote toilet specialists

Introducing the **Zero Discharge 1**. A waterless toilet system for larger public toilet facilities where discharge to ground is not permitted or water is in short supply.

- ✓ A waterless toilet system for larger facilities with a number of cubicles.
- ✓ No mains drainage required.
- ✓ Very low maintenance.
- ✓ No freezing risk.
- ✓ Highly effective fan driven ventilation for most sites.
- ✓ Effective passive ventilation if no mains electricity supply.
- ✓ Waterless urinals for men normally installed.
- ✓ Low water use basins for disabled access cubicles.
- ✓ Wheelchair accessible cubicles as part of the mix.
- ✓ No chemicals, no smells, no fuss.
- ✓ NatSol will work as part of a design team alongside your engineers and architect.
- ✓ User data analysis and recommendations on toilet provision can be provided.

Prices:

There will normally be a consultancy stage for which NatSol will provide a fee proposal.

A quotation for ZD1 tanks and components will follow when the design is agreed.

NatSol will charge a supervision fee for construction and will commission the system.
